

Advancing the Market for Carbon Composites

Submitted by Cliff Eberle, eberlecc@iacmi.org, (865) 661-4292

Speaker is likely to be an IACMI C-Level Officer

IACMI- The Composites Institute is a Manufacturing USA Institute dedicated to rapidly growing the advanced composites market, especially carbon composites. Its economic objective is to commercialize new carbon composites technologies that result in capital investment and high-wage jobs in the composites industry. Technical objectives include major advancements in composites cost reduction, manufacturing energy demand, and recycleability. IACMI currently has more than 160 members, with about 90 members participating in approximately 50 booked projects. This talk will give an overview of IACMI, highlighting its accomplishments and discussing plans for continued advancement of carbon composites technologies and economic impacts.
